distybox 300/5000

- The distybox 300 is a cordless phone plug for universal usage when operating analogue terminals on GAP/DECT systems. It is usable to connect analogue telephones, fax machines, entrance intercoms or modems cordless to a DECT base station. The distybox 300 with integrated aerial has a standard DECT range of 50/300m.
- With distybox 5000 a distance of up to 9 km can be bridged when using DECT software with runtime compensation and external aerials.
- The distybox 300/5000 can be used on each single cell DECT base station which is compatible to the GAP standard.
- The distybox 300/5000 can be used on GAP compliant DECT multicell systems.
- The distybox 300/5000 works like a DECT handset without keyboard and display, but has a line interface to connect any analogue appliance.
- On singlecell DECT systems the distybox 300/5000 works like an additional handset in multilink mode, offering features like CLIP transmission and internal calls.

distybox 300 connects your entrance intercom or
fax machine cordless to DECT/GAP base

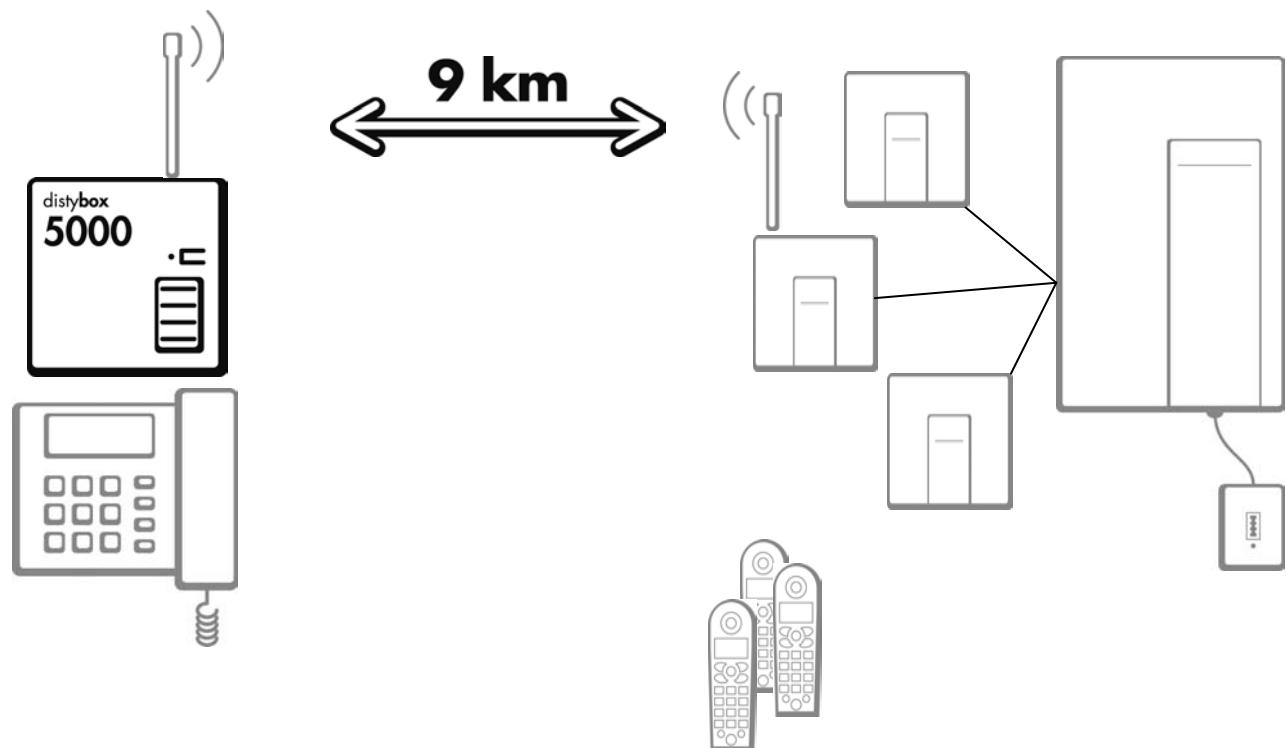

distybox 300 connects appliances cordless to DECT/GAP PBX

distybox 5000 connects cordless to DECT/GAP PBX

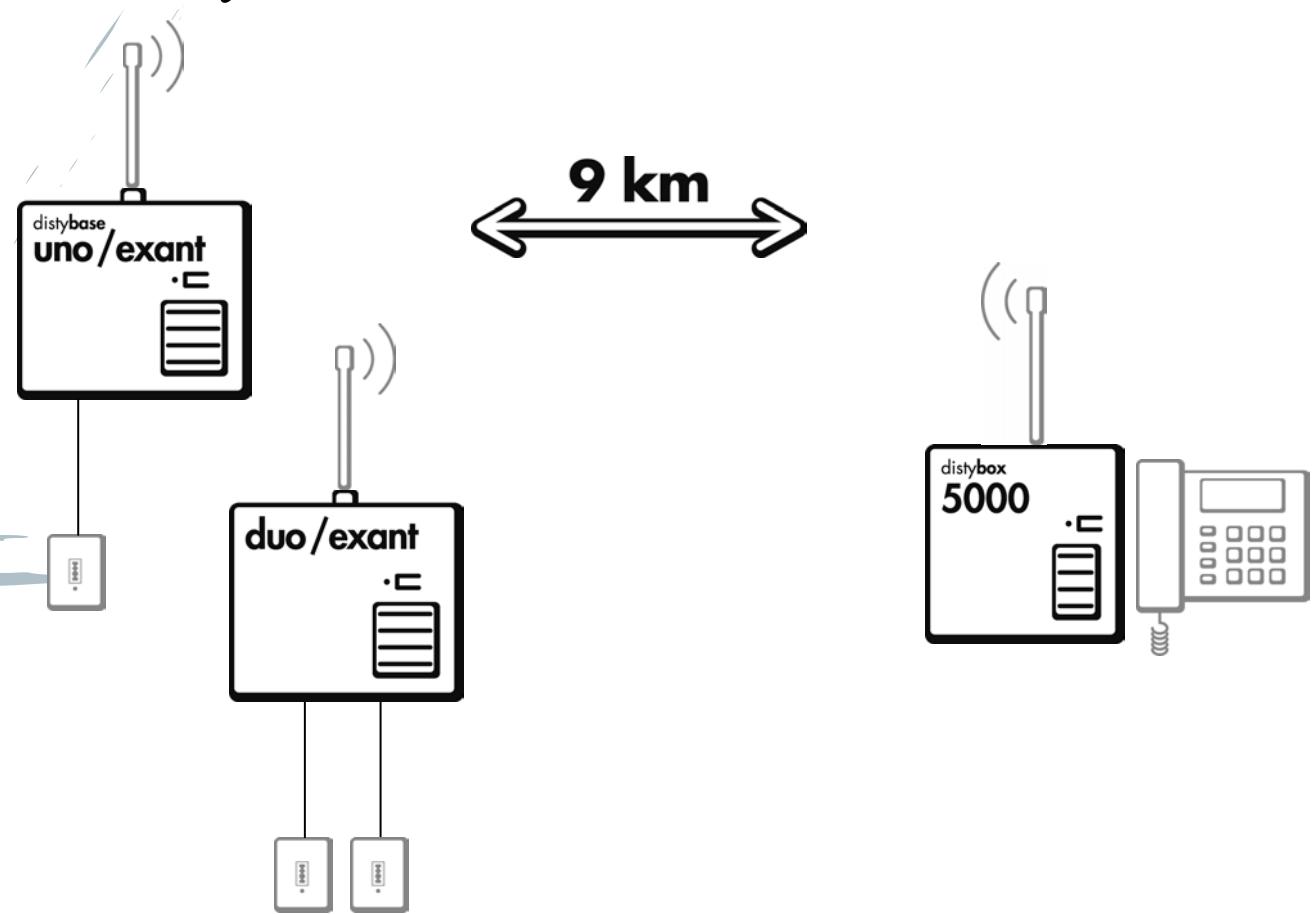

distybase uno/duo/exant

- The distybase uno is a wall mountable DECT base station, usable for 6 GAP handsets and one external PSTN line.
- The distybase duo is a comfortable DECT base station, usable for 8 GAP handsets and two external PSTN lines.
- Due to a various range of features the distybase duo offers the convenience of a PBX e.g. direct inward dialling, seizure of a specific line by each handset
- The distybase duo can be employed in a variety of ways, both directly on the public phone network or as a small DECT adjunct on PABXs.
- The version „exant“ of distybase uno and distybase duo can be connected to an external aerial. This can optimise the range in difficult environments.
- The distybase uno exant or distybase duo exant used in a bundle with distybox 5000 is the optimal low-cost solution for long range connection using DECT standard.

distybase duo as DECT base with DDI for 8 handsets and 2 PSTN lines

distybase uno exant or distybase duo exant and
distybox 5000 as „cordless extension cable“

distybox / distybase

product overview

	Standard	Lines	Handsets	Multicell/ Repeater	Aerial	CLIP	Dial mode	Range
distybox 300	DECT /GAP	1 a/b internal		y/y	internal	FSK/ DTMF	DTMF	50/300m
distybox 5000	DECT /GAP	1 a/b internal		y/y	external	FSK/ DTMF	DTMF	up to 9000m
distybase uno exant	DECT /GAP	1 a/b external	6	-/y	external	FSK	DTMF	up to 9000m
distybase duo	DECT /GAP	2 a/b external	8	-/y	internal	FSK/ DTMF	DTMF	50/300m
distybase duo exant	DECT /GAP	2 a/b external	8	-/y	external	FSK/ DTMF	DTMF	up to 9000m
